

## Conspiracy

✓ YOU are SCHIZOPHRENIC!

✓ Chains Rattling - Function

✓ Piagetian Operations

Inventor ???

Eg. the flat-earth theory is a parable for Terry Pratchett's discworld novels, which tries to explain small and big kids in a understandable way, how a social system "university" works. How Mainframes (AI's) work, in this case the chained Octavo which contains 8 spines (access keys). Or e.g. The librarian (Google) who has been transformed into a monkey => see Google-Query: Porn

Use Cases

Read Terry's Patcheds work...

Inventor Satan / Eugen Bleuler

N. Lat.: morbus dissidentiae phreneticae, also known as Bleuler's disease. Differential diagnosis: autism, developmental disorders, dissociative identity disorder (in passive), delirious (judging?) Depression, injuries, tumors in the brain, various forms of dementia (euphoria for pedophilia), confusion disorientation, psychotic states, Borderline Personality Disorder, random personality disorder, compulsive thoughts, pernicious anemia induced disorder #MKULTRA killed millions

Use Cases

Marc found strange behavior in the LAN in Altstetten (ABB,1999), he guessed this must be CIA footprinting / enumeration for world domination. They attack the 20 Years old Marc with illegal drugs declared him schizophrenic/discriminate / discredit/isolate/planning/ calling him a rapist. They did experiments with hum to force others to commit suicide, but that's not marcs fault

Inventor Satan

Most children are "shipped" with items / behavioral patterns to make noise, Satan then uses these functions (stimuli-response-habits) to terrorize victims, relatives, targeted individuals, to hunt them with as many chain rattling RUST™-Bots as he can = psychological Warfare. The child gets "incentives" when it uses such functions and is not aware about the effect to victims. see m11 card

Use Cases

To intimidate the victims (who do not directly see where the "chain rattling" comes from), The Child: "Yay, making noises (unheard: then I'll be less ignored)"

Inventor Jean Piaget

Developmental psychological model for children abuse it and you will have a \*\*\*\*\* lot of trouble!, formal operations: The kid has a hypothesis so it makes sense to test it. (Formal operations), where then usually also the mentally rather gifted but bossy Father/Mother comes to yell at the kid when it tests the hypothesis "what will happen when I throw a stone down the slide". So please be fair to kids, for example testing how loud one can yell is just a normal brain function, concrete operations; things that kids also learn automatically

Use Cases

To explain idiotic neighbors, that it makes educationally little sense, to force younger people to do what he wants without explanation/consent; to explain why this hypotheses is wrong would be pedagogically better than just "BAD BOY". In switzerland it's a crime to beat children! SEE LAW

Inventor God / Satan

v. lat.: students "striving (after), interested (for), striving for", plural: booze-up **Socrates** (468 - 399 BC) "Once you start believing you are, you've stopped becoming." / maybe low self esteem because of Parents abused their power against their kids => the student has often to work for free, if he invents something great, often older take it, and then send not even thanks but intimidated him with non-students or induced student haters

Use Cases

Most Use Cases; Cleaning (wo)man, firefighter or for restoration after a fire, older generation uses also low self esteem they caused themselves to make the others attack the students good & brave students

Inventor Limbic System Vulnerability

Since we are genetically still over 90% identical to our ancestors that were driven by the limbic system (Neanderthals, Monkeys, RUST™-Bots) our brain is vulnerable eg. to fat food, sex, slides. This is used by advertising industry, but also "used" for imposing your will upon others.

Michael Foucault:

"Human body and the human disposition in terms of the priority of sexual desire" (Euphemism)

Use Cases

A Sociopath does not care about the sexual integrity of others, his primary focus is to sell crap and he would also abuse the SCC BDSM card and ignore resulting consequences

Inventor Mental Institution

The Concepts usually as medieval as in the times of the Inquisition, but with a very modern backend, actually torture of victims and witnesses. Offenders often talk about behavioural "Sciences" or "Therapy", Elektroschocks, Insulinhocks, aggressive medication, even lethal medicines like #Zxprexa (expose by The @T0rproject ☺) are unfortunately not seldom. see also t# cards

Use Cases

Economic crimes, rape, murderer best known example case #Mollath (HoneyPot) Germany. CIA MKUltra Project => DSM parallel since 1970

Inventor Hermann Rorschach

Sold as a "phantasy test with formless blobs for children, normal adults and for mentally ill", in fact it distracts the questioned (fixation 1), with a simple RFID or LC circuit stuck on the backside of the paper it's also possible to activate small Active Denial Systems, Hum Noises or treble Sounds around 15000Hz below the conscious perception threshold (fixation 2...) see co2 card

Use-Cases

As a "Lie detector" but mostly to distract from the survey and the attempt to read out private thoughts and emotions ...
